IDENTIFIERS	*Connecticut

ABSTRACT

A guide to career training programs below the baccalaureate level in Connecticut was compiled from a survey of all schools offering identifiable programs of formal education for careers. Intended as a tool to assist students and guidance counselors in learning about the schools and programs, the guide does not recommend any specific schools or programs. Among the types of schools included are State regional vocational-technical schools, business schools, cosmetology schools, flight schools, hospital schools, trade and technical schools, State technical colleges, State colleges and university divisions, State community colleges, junior colleges, private colleges and universities, and some special schools. The first section provides an occupational cross-index of Connecticut vocational education and career training programs, organized alphabetically by occupational areas; the second is an alphabetical directory of the schools. Basic information and general admission requirements are included for each entry, as well as a listing of vocational programs offered. Not included are vocational programs offered by local school systems, as it is assumed that students have access to this information. (Author/MF)

FOREWORD

In 1971 the Research and Planning Unit of the Division of Vocational Education contracted with University Research Institute of Connecticut, Inc. (URIC), for the compilation of a guide to career training programs below the baccalaureate level in Connecticut.

URIC conducted an intensive survey of all schools offering identifiable programs in Connecticut, and consequently, produced a guide to serve students, parents, counselors, and others in seeking information about career education programs in the state. Since the original guide was very well received and widely used by so many of these people, a contract was awarded to URIC in early 1975 to revise and update the guide for use beginning with the 1975-76 school year. Wherever feasible, we have tried to incorporate suggestions that were offered by the users of the earlier edition.

We sincerely hope that this continues to be a very useful publication. We welcome any comments or suggestions for future improvements.

Walter A. Bialobrzeski
Acting Associate Commissioner
Division of Vocational Education

VOCATIONAL CAREER GUIDE FOR THE STATE OF CONNECTICUT

Introduction

This Guide is intended to serve as a comprehensive inventory of vocational career education in Connecticut. Its purpose is to assist students and guidance counselors in learning about the schools and programs in Connecticut which provide formal education for careers below the baccalaureate level.

Both the Connecticut State Department of Education and University Research Institute of Connecticut, Inc. have made every effort to assure a maximum degree of completeness and accuracy in this publication. Unfortunately, not every school responded to the survey and, in some instances, complete information could not be obtained. We regret any ommissions or errors on our part. While every attempt has been made to verify approval and accrediting information with the approving agency, neither the State Department of Education nor URIC can be responsible for any misrepresentations submitted by individual schools.

This Guide is not intended to sell, recommend, or imply approval of any specific schools or programs. It is intended merely as a tool to inform the user about the wide range of vocational and career training programs in Connecticut and to supply information about these programs and the schools in which they are offered. As times and conditions change, much of the information presented will become outdated. It is strongly recommended that direct contact be made with individual schools and approving agencies to obtain more complete and more recent information.

It should be kept in mind that numerous other career training programs are available through apprenticeships, through on-the-job

training programs, and through various public and private agencies. Most school guidance counselors and Connecticut State Employment Service offices have information on such programs.

Scope

This Guide includes vocational career programs below the baccalaureate degree level in Connecticut public and private schools, colleges, and universities. It is assumed that students have access to complete information on vocational programs offered by their own local school systems, and therefore, such programs are not included.

Among the types of schools included are state regional vocational-technical schools, business schools, cosmetology schools, flight schools, hospital schools, trade and technical schools, state technical colleges, state colleges and university divisions, state community colleges, junior colleges, private colleges and universities, and some special schools. The Guide includes only those correspondence schools that are based in Connecticut.

Use of the Guide

The Guide is divided into two sections.

The first section lists alphabetically all the occupational programs covered in this Guide. Because some occupations may have several different titles, numerous cross references have been included in this listing. Each occupational listing is followed by the names of schools, their locations, and the page number for each school's program. This cross-index of occupations runs from page 7 through page 16. For the user's convenience, the pages are alphabetized at the top.

The second section of this Guide is a directory, or an alphabetical listing of the identified schools and institutions in Connecticut. This

school listing provides basic information on the schools and their career programs. Where possible, the school address, telephone number, year established, accreditations and approvals, general admission requirements, student body size, student housing availability, and other information is presented. The vocational career programs are also described in terms of length, number of instructional hours, availability, tuition costs, and type of recognition awarded upon satisfactory completion. This directory listing is presented in a standard, impartial format. The pages of this section are also alphabetized at the top.

General Admission Requirements

There are three groups of State operated institutions which have standard basic admission requirements and similar programs within each group. As these schools represent a significant portion of the relevant educational effort in Connecticut, basic information and general admission requirements for each group are given below. This information is not repeated in the school directory section of this Guide, but it is appropriately referenced.

State Regional Vocational-Technical Schools

General Information:

The regional vocational-technical school program is essentially a three-year program from Grades 10 - 12. The ninth grade program is a period of trade exploration for better vocational selection.

The school year is divided with one-half of the time allotted to skilled trade training and the remainder devoted to general and related education. Graduates of the secondary program receive a high school diploma.

Some schools offer trade certificate programs for high school graduates, veterans, and others.

Such programs (Barbering, Welding, etc.) are usually of one-year duration. Such persons may also be accepted into special programs in other trade areas when space is available.

There is no tuition for Connecticut residents.

The minimum standards of admission for regular day preparatory secondary school programs are as follows:

a. Successful completion of grade 8 or 9 and readiness for grade 9 or 10.
b. Physical fitness for the trade desired.
c. Evidence of ability to successfully complete the program.
d. Interest in vocational education.
e. Entrance test and/or interview.
f. Physical Examination.

Special Admission Requirements - Dental Assistant:

Over 18 years of age. High school diploma or equivalent education. Entrance test and interview. Physical exam and character references. One-year program.

Special Admission Requirements - Licensed Practical Nurse:

One-year program consisting of four months training in vocational-technical school and eight months in an affiliated hospital. Applicants under age 20 must be high school graduates. Applicants 20 years of age or over should have two years of high school credit or the equivalent. Entrance exam, physical exam, interview, and character references required.

Special Admission Requirements - Aviation Mechanics:

High school diploma or equivalent education. Entrance test, interview, and physical exam. One-year program.

State Technical Colleges

Admission Requirements -- Pre-Technical (one-year) Program:

1. High school diploma or State high school equivalency certificate.
2. Entrance examination.
3. Evidence that applicant can benefit from program.

Admission Requirements -- Associate Degree (two-year) Program:

1. High school diploma or State high school equivalency certificate.
2. Four units in English.
3. Two units in mathematics (1 in algebra, 1 in geometry, or 2 in algebra).
4. One unit in physical science with laboratory (chemistry or physics).
5. Scholastic Aptitude Test (S.A.T.) scores are recommended.
6. Entrance examination if indicated.

State Community Colleges

Admission Requirements:

All community colleges require that applicants be high school graduates or the equivalent or have demonstrated ability to do college work. Further requirements for certain programs may vary from one college to another.

Hairdressing and Cosmetology Schools

Hairdressing and Cosmetology Schools are licensed by the Connecticut State Board of Health under Chapter 387, Revision of 1958, of the General Statutes of Connecticut. Registration is limited to the first week of every month. Admission requirements include:

1. Minimum age 16 - proof required.
2. Physical examination.
3. Successful completion of eighth grade.

Program requirements set forth include a minimum of two thousand instructional hours in not less than one year, and prepare students to take state license examination.

Avocational Schools

Schools providing instruction in music, dance, acting, modeling, and language learning are technically considered avocational since the courses as such do not prepare the student for a vocational career; however, since these courses may be closely related to, or may be primary steps towards such a career, a number of these schools have been included in this directory.

Approval Information

Whereever approvals, accreditations, licensures, admission requirements and programs in the directory portion of this Guide are not referenced the prospective student should check details directly with the school.

Abbreviations

Most of the abbreviations used in this Guide need no explanation. The few which might not be known readily are lisited below.

A.I.C.S.	Association of Independent Colleges and Schools
B.E.O.G.	Basic Educational Grant
C.A.C.	Cosmotology Accrediting Commission

Acknowledgements

As the University Research Institute of Connecticut, Inc. (URIC) is an independent consortium of the research interests and capabilities of twelve Connecticut universities and colleges, this Guide could not have been prepared without their individual cooperation. The acknowledgement of URIC's "associated institutions" is most appropriate, viz:

UNIVERSITY OF BRIDGEPORT

CENTRAL CONNECTICUT STATE COLLEGE

CONNECTICUT COLLEGE

FAIRFIELD UNIVERSITY

UNIVERSITY OF HARTFORD

UNIVERSITY OF NEW HAVEN

RENSSELAER POLYTECHNIC INSTITUTE OF CONNECTICUT

SACRED HEART UNIVERSITY

SAINT JOSEPH COLLEGE

SOUTHERN CONNECTICUT STATE COLLEGE

TRINITY COLLEGE

WESLEYAN UNIVERSITY

WESTERN CONNECTICUT STATE COLLEGE

YALE UNIVERSITY
